Growing beyond a junior developer..

What is next?

Tech industry is growing

———

If you are in the tech industry you know there is a lot of choices and opportunities.

Overwhelming !!

———

Yes, but it's a good problem
to have..

At the beginning

———

You will usually start as a junior developer/ software engineer.

- Study
- Self taught
- Bootcamp/ workshops ..etc

Different focuses in the industry

Junior developer in what?

———

When you start learning programming, you start with a language and usually each language is used in certain fields.

So what are these fields or focuses that you can choose?

DATA SCIENCE

CYBER SECURITY

DEVOPS
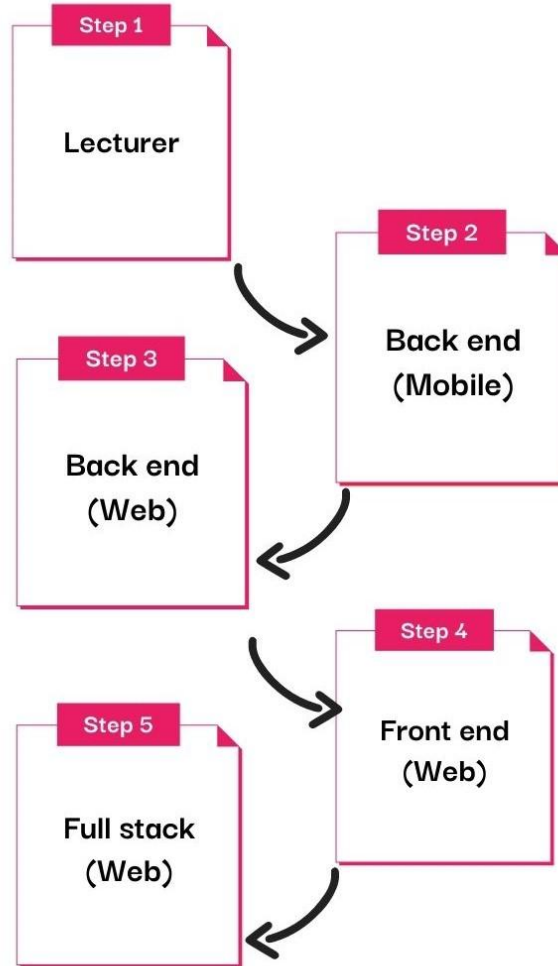

ML & AI

TESTING ENGINEER

What to choose

———

All these are as good, just pick what you find fun and focus your learning for a while.

No need to feel pressure, you can start in one area then specialize or go into other.
